WHEN DID A CAR LAST EXCITE?

One that's stunning to look at and beautiful to own. One that's rapid, all-electric, and amazingly refined. Now available with Lexus Steer-by-Wire, the RZ is designed to reignite your passion for driving. Crafted by our "Takumi" artisans in Japan, this car welcomes you like no other. In the spacious cabin, enhanced by the new panoramic roof, you'll instantly feel fresh and relaxed.

Sound like the luxury SUV for you? Then come and discover the pure enjoyment of driving the all-electric RZ 350e, or RZ 550e F SPORT.

This is Lexus Electrified.

NEAR SILENT, NEVER UNSEEN

Electricity. You can't see it, hear it, or touch it. Perhaps that's why many believe that electric cars mark the end of driving pleasure. At Lexus, however, we see electrification as a unique chance for even more fun. To achieve this we've designed a car that not only looks amazing but feels amazing to drive. Hundreds of pencil sketches, followed by hand crafting in clay, produced the sleek body and muscular flanks that tell you this is a true luxury SUV. So does the plentiful space inside for you and your passengers.

In short, we've designed this car the hard way, as we believe it's the only way.

BOLD, BOLDER, F SPORT

Viewed from the front, you'll notice the RZ's exquisite LED headlights, underscored by Lexus signature daytime running lights, a bold feature inspired by Samurai swords. To the rear, an extra-wide LED light bar projects our latest 'Lexus Electrified' look. From every angle, the RZ 550e F SPORT makes a bolder statement. Now available in exclusive Neutrino Grey, the F SPORT grade stands out with black aerodynamic elements – like a performance-enhancing front grille and rear spoiler – while you can't help but notice the 20" alloys.

~~This is how we electrified this car the hard way, as we believe it's the only way.~~

"DESIGNED TO ENHANCE YOUR SENSES & DELIVER PRECISELY THE
DRIVE YOU DESIRE, THE RZ IS THE PUREST EXPRESSION OF OUR LEXUS
DRIVING SIGNATURE & ADVANCED ELECTRIC TECHNOLOGY."
Lexus International Chief Engineer, SHINYA ITO

~~This is how we designed this car the hard way, as we believe it's the only way.~~

THE FUTURE IS IN YOUR HANDS

To slide inside the RZ is to steal a glimpse of the future. Revolutionising the way you drive, Lexus Steer-by-Wire makes both urban streets and country roads come to life. As you glide, relax in the driver-centric 'Tazuna' cockpit, its instruments positioned in your line of vision. Amidst the advanced technology, it's reassuring to sense the human hand. For example, the hand-stitched steering wheel, laser cut door trims and supple ultra-suede seating can be attributed to our famed 'Takumi' craftspeople, their artistry honed over at least 15 years.

~~This is how we designed this car the hard way, as we believe it's the only way.~~
